Todd Sutter
P1 Team Composition And Initial Project Idea Document
Due September 3, 2017

Software Squad

Members:

Todd Sutter	Team Leader, Tech Support
Quinn Nelson	Architect, Quality Assurance
Mariah Schon	Scribe
James Schnitzer	Software Developer

Initial Project Idea:
We are going to create a web application similar to Craigslist. Our application will allow users to create accounts with their email and password, upload items that they would like to sell, and search for items they would like to buy. They will not be able to pay each other through our website, but they can use our private messaging system to coordinate and meet up.

Other features may include:
- Password reset
- Account deletion
- User Profiles and Ratings
- Donation feature
- Advertisements
